SWINE IMPROVEMENT

IV

During the Period

1965 - 1966

By

Charles E. Shelby

Regional Swine Breeding Laboratory

Swine Research Branch, AHRD, ARS, USDA

225 Kildee Hall

Ames, Iowa

10-31-69

FOREWORD

Swine Improvement is, hopefully, a reasonably complete Bibliography in one readily accessible source. All of the articles listed have a bearing on Swine Breeding Plans. Many early and unpublished studies, not readily available to current research workers are included, especially in Volumes I-III. Citations are limited to articles written in English or with English Summaries. An ABA citation is included whenever available.

Swine Improvement is an expansion and more carefully edited version of Bibliography of Swine Improvement. Volume IV is a merger and updating of Volumes V and VI of the Bibliography of Swine Improvement. Many additional citations are included.

Sources of the citations included: 1) Bibliographies of Technical Articles 2) Library Search at Iowa State and other Universities, 3) the Bibliography of Agriculture, 4) Animal Breeding Abstracts, 5) Bibliography of Reproduction, 6) Braude's Index of Current Research in Pigs, 7) Microfilm Abstracts, 8) Dissertation Abstracts, 9) Ward's Index of Scientific and Economic Studies of Particular Significance to the Swine Industry in the United Kingdom, 10) Experiment Station Annual Reports, 11) Biological Abstracts, 12) Experiment Station Record, 13) Agricultural Index, and other sources.

In addition to swine genetics, the Bibliography now includes selected technical articles in reproductive physiology, meats, production, nutrition, physiology, zoology, and veterinary medicine. Popular articles by swine geneticists in this country were included, when known. Testing Station reports were not usually included, unless several years work was summarized.

In editing the Bibliography, a listing of all journals used with date of issue and volume numbers at ten year intervals evolved. A standard listing of abbreviations was also compiled. This was issued as A Guide to Swine Breeding Literature (1968). Several new journals not included in this listing are found in the present volume.

Due to a reorganization of the activities of this office, Swine Improvement will be discontinued with the issuance of this or perhaps one or two more volumes.
